Baron's Report

TOA is our main concern. May need to find other locations for bransles. Need regular War Practice, the LG army is not comparable to things like Wolf Pack.

Revisit an award for A&S – in the past we handed a few things out under a couple different names. We were thinking of creating a baronial commission or patent, to recognize specific examples of art and not just the artesian. (Potentially an artist could get the award multiple times for different efforts) It would look something like a baronial patronage. Not really an order – just based on history like the Keystone – people outside the barony who contribute heavily to the barony

Recognize excellence in a product made by an individual – A&S covers a wide variety of stuff.
